

TOOLS AND ENHANCEMENTS

As a Job Post Package Advertiser, the IEEE Job Site offers more than just a text description of your open position.

You have the ability to make your job posting stand out more like a company announcement – *at no additional cost!*

Available Enhancements:

- Upload a company logo to display with your job listing on the search results page as well as your job detail page. Your logo can also be added to your company profile.
- Enhance your job posting by embedding your hosted company video.
- Include a company profile that will display on the job detail page below the job description.
- Adjust the color scheme for your company profile to be consistent with your company brand using themes or the CSS override tool.
- Upload your own company template to display your company branding on the job detail page. The template header and footer will wrap around the content of your job posting.
- Indicate if you would like to include a skills interview with your job posting. Skills interview introductory text – also known as E-Screen – encourages job seekers to complete the interview questions during the apply process.
- Include Google Maps to your company profile. This feature provides job seekers with directions to your company.
