

Email Blasts

Take your marketing message beyond the IEEE audience with a non-member sponsored email blast.

Over 97,600 IEEE non-member engineers, computer and technology professionals who registered for IEEE Spectrum online events and newsletters have opted to receive 3rd party information from tech marketers like you!

These technology professionals recognize IEEE Spectrum as the foremost provider of the latest news, opinions and information about new technology innovations, and are an actively engaged audience.

Take advantage of the knowledge and purchasing power of this group by sending a dedicated single sponsor email blast to the entire list or a demographic subcategory that pertains to your special tech products. You provide the content in HTML format and we will send out the campaign on a specified date on your behalf.

COMSOL CONFERENCE USER PRESENTATIONS

Multiphysics papers and presentations now available for download

Hello,

Instantly browse over 700 papers, posters, and presentations on multiphysics simulation. This brand new multiphysics resource contains ground-breaking applications from research, engineering, and industry.

[Click here for Complimentary access to the COMSOL Conference User Presentations](#)

Topics featured:

- AC/DC
- Electromagnetics
- Acoustics & Vibrations
- Batteries, Fuel Cells, & Electrolytic Processes
- Bioscience & Bioengineering
- Chemical Reaction Engineering
- Computational Fluid Dynamics
- Electromagnetic Heating
- Geophysics & Geomechanics
- Heat Transfer & Phase Change
- MEMS & Nanotechnology
- Microfluidics
- Multiphysics
- Optics, Photonics & Semiconductors
- Optimization & Inverse Methods
- Particle Tracing
- Piezoelectric Devices
- Plasma Physics
- RF & Microwave Engineering
- Simulation Methods & Teaching
- Structural Mechanics & Thermal Stresses
- Subsurface & Porous Media Flow
- Transport Phenomena

Best regards,
COMSOL

P.S. We encourage you to forward this offer to your friends & colleagues!
